

# St. Mary Junior High

## Helpful Links

Here are all of our links in one place. We will update this document during the year.

### Math

[www.my.hrw.com](http://www.my.hrw.com)

Online textbook- you were emailed your child's login information. The username and password will also be written in the front cover of their planner. The site includes the pages of the text plus resources and homework help.

Other helpful math practice links:

<http://www.mathplayground.com/wordproblems.html>

<http://www.mathwire.com/problemsolving/probs.html>

<https://eu.ixl.com/math/word-problems>

<https://www.khanacademy.org>

### United States Conference of Catholic Bishops

[www.usccb.org](http://www.usccb.org)

This is a great website for finding information on our Church, the daily reading, and the liturgical calendar. Use it as a resource for reflection, including the Mass reflection assignment given each week.

## Science- STEMscope

<https://n12003d132669.acceleratelearning.com/login>

Each child has his or her own login information. STEMscope is the online curriculum that we use in our science classes. Use the site for vocabulary, reading, and research.

## Vocabulary Workshop Practice

[www.vocabularyworkshop.com](http://www.vocabularyworkshop.com)

This site has games and other cool resources to help students learn their vocabulary words. You will need to make a free account using a code that is in the front cover of the student book. After that, you will just need the username and password you create.

## Spanish practice

<http://studyspanish.com>

<http://www.quia.com>

Students can practice their Spanish vocabulary and grammar with fun exercises like matching/multiple choice hangman games. To use the site, students need to know the name of their textbook: 6<sup>th</sup> is Viva El Español Adelante. 7<sup>th</sup> & 8<sup>th</sup> use Mi Vida Loca

## Typing Practice

<http://www.powertyping.com/qwerty/lessonsq.html>

<http://www.learnstyping.org/beginnertypinglesson1.htm>

This year students will use computers for assignments in their classes. To help them become more efficient with their work time, we suggest that they spend 5-10 minutes each day practicing typing using these free links. The second site includes visual learning. Practicing will help students increase their typing speed and accuracy.
